

Remember that the quality of the deliverables, hence the quality of the final school on the labor market depends on you. The more difference during the Covid crisis affects more flexibility in your progress into your curriculum, but also brings more risks of delay, repetition, lateness, that will have negative impact on your development. We do count on your maturity and wisdom during these stressful times for the benefit of the entire community.

SCALE FOR PROJECT CPP MODULE 04

You should evaluate a student in this team

Git repository

Introduction

Only grade for work that is in the student or group's Git repository.

Double-check that the Git repository belongs to the student or the group. Ensure that the work is for the relevant subject and also check that you don't credit a credit or empty folder.

Check carefully that no irrelevant details were used to help you and make you evaluate something other than the content of the official repository.

To avoid any surprises, carefully check that both the evaluating and the evaluated students have received the possible output code to facilitate the grading.

If the evaluating student has not completed that particular project yet, it is mandatory for this student to read the entire subject before starting the delivery.

Use the flags available on this scale to signal an empty repository, non-functional program, code not compile, missing this in these cases, the grading is zero for the first grade (1-3) and 42 in case of "missing" / "failure". However, if during the grading you are encouraged to continue to discuss your work (even if you have not finished it) to clarify any issues that may have caused this failure, and avoid repeating the same mistake in the future.

Remember that for the duration of the delivery, no input, no other program, generation, execution or compilation termination of the program, via the final grade (1-3). Use the appropriate flag.

You should never have to add any flag except the configuration file if it exists. If you want to add the flag, then you have to explain the reason with the evaluated student and make sure both of you are okay with this.

You must also verify the absence of memory leaks. Any memory allocated on the heap must be properly freed before the end of execution. You are allowed to use any of the different tools available on the computer, such as `leak`, `valgrind`, or `gdb`. Note: in case of memory leaks, use the appropriate flag.

Disclaimer

Please respect the following rules:

Be timely, polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.

Identify with the person for the group evaluated the essential difficulties of the work. Take the time to discuss and debate the problems you have identified.

You must consider that there might be some difference in how your group might have understood the project's intention and the scope of its functionalities. Always keep an open mind and grade fairly as far as possible. The methodology is valid only and only if your evaluation is conducted seriously.

Guidelines

You must compile with `clang++` with `-std=c++11` and `-std=c++14` and `-std=c++17` and `-std=c++20` and `-std=c++23` and `-std=c++24` and `-std=c++25` and `-std=c++26` and `-std=c++27` and `-std=c++28` and `-std=c++29` and `-std=c++30` and `-std=c++31` and `-std=c++32` and `-std=c++33` and `-std=c++34` and `-std=c++35` and `-std=c++36` and `-std=c++37` and `-std=c++38` and `-std=c++39` and `-std=c++40` and `-std=c++41` and `-std=c++42` and `-std=c++43` and `-std=c++44` and `-std=c++45` and `-std=c++46` and `-std=c++47` and `-std=c++48` and `-std=c++49` and `-std=c++50` and `-std=c++51` and `-std=c++52` and `-std=c++53` and `-std=c++54` and `-std=c++55` and `-std=c++56` and `-std=c++57` and `-std=c++58` and `-std=c++59` and `-std=c++60` and `-std=c++61` and `-std=c++62` and `-std=c++63` and `-std=c++64` and `-std=c++65` and `-std=c++66` and `-std=c++67` and `-std=c++68` and `-std=c++69` and `-std=c++70` and `-std=c++71` and `-std=c++72` and `-std=c++73` and `-std=c++74` and `-std=c++75` and `-std=c++76` and `-std=c++77` and `-std=c++78` and `-std=c++79` and `-std=c++80` and `-std=c++81` and `-std=c++82` and `-std=c++83` and `-std=c++84` and `-std=c++85` and `-std=c++86` and `-std=c++87` and `-std=c++88` and `-std=c++89` and `-std=c++90` and `-std=c++91` and `-std=c++92` and `-std=c++93` and `-std=c++94` and `-std=c++95` and `-std=c++96` and
